All-in-One EQUINE MUESLI

Designed as a complete oat based ration, **Sgt Dan ALL-IN-ONE** provides all the essential nutrients required by race horses in medium or heavy work. A selection of high quality proteins provides the essential building blocks for muscle development and repair. New Zealand grown grains, supplemented with an enzyme to improve digestibility, provide the bulk of the energy in this feed. Added vegetable oils provide a concentrated source of energy and aid in maintaining a healthy coat.

Sgt Dan ALL-IN-ONE contains added calcium and phosphorus to support bone development and maintenance. Added sodium, potassium and chloride help to replace those minerals lost through sweating. Added trace minerals and vitamins provide the micro nutrients essential for good health and immunity.

Feeding Recommendations:

- Feed small amounts often (e.g. 2-3 meals a day) to avoid digestive upsets.
- Always introduce new feeds gradually.
- Always allow access to a good quality forage, with an expected forage intake of at least 1.5% of the bodyweight of the horse each day.
- Ensure clean fresh water is always available.

Suggested feeding rates:

Feed **Sgt Dan ALL-IN-ONE** according to the weight, body condition and workload of the horse. The amount of feed required will also depend on the quality and quantity of forage provided. The following feeding rates are a guide only.

Horse weight (kg)	Minimum forage intake (kg DM/day)	Feeding rate (kg/horse/day)		
		Pre-training	Moderate Work	Heavy Work
400	6	2.5 - 4	2.5 - 5	4.5 - 6.5
500	7.5	3 - 4.5	3.5 - 6	5 - 7
600	9	3.5 - 5	4.5 - 7	5.5 - 7.5

Typical analysis (As Fed Basis)

Minimum Crude Protein (%)	12.4
Maximum Fat (%)	5.5
Estimated DE (MJ/kg)	12.6
Maximum Crude Fibre (%)	8
Maximum Salt (%)	1
Maximum Calcium (%)	1.1
Minimum Phosphorus (%)	0.5

Ingredients selected from:

Oats, Barley, Wheat, Wheat Bran, Peas, Soyabean Meal, Vegetable Oils, Molasses, Limestone, Dicalcium Phosphate, Magnesium Oxide, Salt, Potassium Chloride, Amino Acids (e.g. Lysine), Vitamins and Trace Minerals, Mould Inhibitor, Enzymes.
