

Sgt Dan HI-ENERGY NUTS are a high energy grain based supplement which can be fed to all classes of ruminant animals to improve productivity, increase weight gains or to help overcome feed shortages. The 10mm nut is easy to feed in the paddock or in troughs.

Recommended feeding rate:

Hi-Energy Nuts should be fed in conjunction with *ad lib* pasture or silage and should be introduced gradually, with target feed intakes achieved over two or three weeks. Ensure adequate feeding space is provided for all animals to access nuts simultaneously to prevent over consumption. Target feed intakes will depend on the class of animal, its size and physiological state (e.g. dry, lactating, or pregnant), expected performance and availability of forage.

- **Sheep (up to 40kg)** up to 100g per head per day.
- **Sheep (over 40kg)** between 100g to 200g per head per day.
- **Goats** between 150g to 400g per head per day.
- **Deer** between 100g to 500g per head per day.
- **Cattle Weaners** up to 2kg per head per day.
- **Cattle Steers, Heifers, Bulls** up to 3kg per head per day.

Ingredients selected from:

Wheat, Barley, Grain By-Products, Peas, Soyabean Meal, Canola, Cotton Seed Meal, Copra Meal, Vegetable Oils or Fats, Limestone, Salt, Bentonite, Flavourings, Dicalcium Phosphate, Molasses, Vitamins & Trace Minerals.

Typical analysis (Dry Matter basis)

Minimum Crude Protein (%)	12
Maximum Fat (%)	4
Maximum Crude Fibre (%)	10
Maximum Salt (%)	1
