Summer 16 DAIRY PELLETS

Sgt Dan SUMMER 16 DAIRY PELLETS are designed as a combined energy and protein supplement for lactating dairy cows fed predominantly New Zealand summer pasture. A combination of grains provide starch and sugar as the primary energy source while a variety of good quality protein meals provide a source of high quality protein. Macro and trace minerals have been added to help meet the requirements of a lactating dairy cow.

When fed at 2kgs per cow per day this diet provides:

- 16.5g of calcium (equivalent to 50g of limestone)
- 19g of magnesium (equivalent to 36g of magnesium oxide)
- 7.6g of sodium (equivalent to 20g of salt)
- 500mg zinc, 150mg manganese, 200mg copper, 6mg iodine, 5mg cobalt, 4mg SELENIUM, vitamins A, D3 and E.

Recommended feeding rate:

- Typically fed at 2kg per head per day, this feed can be fed at up to 4kg per head per day.
- This product is designed to be fed through an in-shed feeding system (or similar) where intakes per cow can be controlled.
- Exercise caution if high levels of other starchy feeds (e.g. summer turnips) are being fed at the same time.

Ingredients selected from:

Wheat, Barley, Grain By-Products, PKE, Oilseed Meals, Peas, Vegetable Oils or Fats, Molasses, Limestone, Magnesium Oxide, Bentonite, Dicalcium Phosphate, Salt, Vitamins and Trace Minerals, Flavouring.
