

# Chick Starter

with Coccidiostat

FOR ANIMAL TREATMENT ONLY

Contains 100mg/kg Lasalocid (As 500mg/kg Bovatec® 20% A9679) as an aid in the control of coccidiosis caused by *Eimeria* species.

*For over 100 years our mill has been working with Southland farmers, taking the golden grains grown in the deep south, and producing a product of the highest standard. Today, still true to our heritage, we carefully select Southland grains and blend these with protein rich South Island grown peas and canola to bring you a rich, nutritious feed, helping you provide the best quality nutrients for your animals.*

Old Mill Chick Starter is a nutrient rich blend of New Zealand grown grains and protein sources, essential amino acids, minerals and vitamins formulated to provide all the nutrients required for the optimal growth and performance of young layer and meat chickens and turkeys from day old.

Produced in a crumble form, Old Mill Chick Starter is ideal for very young birds as particles are consistent but small enough for birds to consume easily.

## How Much Should I Feed?

- Feed *ad lib* from day old.

### Laying Hen Chicks

- Feed consumption per bird from day old to 6 weeks will be approximately 1kg.
- If chicks are below breed standard at 6 weeks of age, Old Mill Chick Starter can be fed for a longer period.

### Meat Chickens

- Feed consumption per bird from day old to 42 days will be approximately 6kg.
- Ensure clean fresh water is always available.

## TYPICAL ANALYSIS (As Fed Basis)

CRUDE PROTEIN (% MIN)	17
CRUDE FAT (% MAX)	5
CRUDE FIBRE (% MAX)	5
CALCIUM (% MIN)	1

## INGREDIENTS

ALL OLD MILL FEEDS ARE MADE WITH **NON-GE** GRAINS AND PROTEIN MEALS.

Wheat, barley, maize, canola meal, peas, krill meal, canola oil, limestone, dicalcium phosphate, sodium bicarbonate, salt, amino acids, enzymes, Bovatec®, vitamins and trace minerals.

# Chick Starter

with Coccidiostat

FOR ANIMAL TREATMENT ONLY

Contains 100mg/kg Lasalocid (As 500mg/kg Bovatec® 20% A9679) as an aid in the control of coccidiosis caused by *Eimeria* species.

## CAUTION:

Not suitable for feeding to waterfowl.

Do **NOT** allow dogs, horses or other equids access to feeds containing Bovatec® as ingestion by these species may be fatal.

Bovatec 20% is registered pursuant to the ACVM Act 1997, A9679. See [www.nzfsa.govt/acvm](http://www.nzfsa.govt/acvm) for the registration conditions.

## CONTRAINDICATIONS:

Care must be exercised when feeding concurrently with other antimicrobials.

Do **NOT** feed with other ionophores e.g. monensin®.

Do **NOT** exceed recommended dose rates. **Not** to be used for single dose treatment. Feed continuously as the sole ration.

## WITHHOLDING PERIODS:

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standard.

**MEAT:** Nil

**EGGS:** Eggs from treated birds must not be sold for human consumption for 14 days following the last treatment.

By law the user must take due care, obtaining expert advice if necessary to avoid unnecessary pain and distress when using the product other than as directed on the label.
