

Layer Pellets

For over 100 years our mill has been working with Southland farmers, taking the golden grains grown in the deep south, and producing a product of the highest standard. Today, still true to our heritage, we carefully select Southland grains and blend these with protein rich South Island grown peas, canola and linseed meal, to bring you a rich, nutritious feed, helping you provide the best quality nutrients for your animals.

Old Mill Layer Pellets are a wholesome blend of New Zealand grown grains and rich protein sources, essential amino acids, minerals and vitamins, formulated to provide all the nutrients laying hens need to produce healthy, nutritious eggs.

How Much Should I Feed?

- Feed *ad lib* from 19 weeks of age or from first egg.
- Feed consumption will vary from 110 to 130g per bird per day depending on the climate and availability of other feeds.
- Ensure clean fresh water is always available.
- Do not feed to non-laying birds.

Selenium Enriched

Old Mill Layer Pellets are enriched with selenium, a trace mineral which is often low in New Zealand soils. Selenium plays an important role in metabolism, supporting the immune system and helping to protect body tissues from damage caused by oxidative

Natural Pigments for Nutritious Eggs

To help your hens produce eggs with rich golden yolks, Old Mill Layer Pellets contain natural pigments, extracted from marigolds and paprika. These are a rich source of the essential antioxidants lutein and zeaxanthin and are a great way to support the well being of your hens and anyone enjoying their eggs.

Typical Analysis

CRUDE PROTEIN (% MIN)	15
CRUDE FAT (% MAX)	8
CRUDE FIBRE (% MAX)	7
CALCIUM (% MIN)	3.5

Ingredients

ALL OLD MILL FEEDS ARE MADE WITH **NON-GE** GRAINS AND PROTEIN MEALS.

Wheat, barley, oats, grain by-products, canola meal, peas, linseed meal, canola oil, limestone, dicalcium phosphate, salt, sodium bicarbonate, amino acids, enzymes, natural pigments, vitamins and trace minerals.
